About

DevOps-oriented software developer with 2+ years of hands-on experience building, deploying, and supporting production applications across full-stack and cloud environments. Skilled in automating CI/CD pipelines, managing infrastructure with GitHub Actions and Azure, and bridging development and operations through secure, scalable workflows. Holds a Postgraduate Diploma in Cybersecurity from Sault College (Ontario) and a BSc in Computer Science — bringing a security-first mindset to every deployment. Proven ability to ship features end-to-end, reduce system incidents through documentation and monitoring, and collaborate cross-functionally in Agile teams. Currently based in Brampton, Ontario, authorized to work in Canada.

Core Competencies

DevOps & Cloud: CI/CD Pipelines, GitHub Actions, Azure DevOps, Docker (familiar), Linux Systems Administration, Cloud Security, Infrastructure Monitoring

Development: React.js, JavaScript (ES6+), TypeScript, REST API Integration, Full-Stack Web Development, WordPress & WooCommerce

Security & IT: Cybersecurity Fundamentals, Network Security, Identity & Access Management (IAM), Active Directory, Microsoft 365, Incident Response

Tools & Workflow: GitHub, Jira, Trello, Postman, SDLC, Agile Methodology, Technical Documentation, Ticketing Systems

Soft Skills: Cross-Functional Collaboration, Stakeholder Management, Problem Solving, Technical Troubleshooting, Leadership & Mentoring, Attention to Detail

Experience

Independent - *Freelance Full-Stack Developer*

2024 – Present

- Delivered 3 client projects across Canada, UAE, and India that met 100% agreed milestones by coordinating requirements, feedback, and hosting handoffs across time zones.
- Implemented WordPress and WooCommerce setups for 2 businesses that increased online booking and purchases by 15% by configuring themes, plugins, and content workflows.
- Provided post-launch support for 6 sites that improved uptime to 99% by monitoring issues and applying rapid fixes to production updates.

Reverr - *Software Developer*

2023 – 2024

- Developed and maintained 12 React.js features that reduced UI defects by 25% by enforcing TypeScript typing and clean code patterns.
- Integrated 8 REST API endpoints that improved data consistency by 20% by aligning JSON contracts and error handling with backend engineers.
- Delivered 85 tickets end-to-end that improved sprint throughput by 15% by executing SDLC tasks in Agile sprints using Jira and Trello.
- Administered 120 GitHub pull requests that reduced merge conflicts by 30% by standardizing branching, code reviews, and merge practices.

Genieall Corporation - *IT Help Desk Intern*

May 2025 – Aug 2025

- Resolved 220 Tier-1 tickets that improved first-contact resolution to 80% by troubleshooting hardware, software, and account incidents through the ticketing system.
- Provisioned 90 user accounts that reduced access delays by 35% by managing Microsoft 365 and Active Directory requests with documented approval steps.
- Authored 25 knowledge base articles that cut repeat incidents by 15% by documenting recurring fixes and standard operating procedures.
- Escalated 40 complex cases that reduced mean time to resolution by 20% by collecting logs, reproducing issues, and coordinating with senior technicians.

How To Abroad - *Web Developer Intern*

Dec 2022 – April 2023

- Built a college discovery module with pagination, search, multi-sort, and tuition filters that improved user task completion by 30% by implementing JavaScript UI logic and AJAX-driven REST APIs.
- Translated 15 Figma screens into mobile-first pages that reduced layout rework by 25% by applying responsive HTML5 and CSS3 patterns.
- Optimized client-side interactions that decreased page response time by 20% by minimizing DOM updates and refining JavaScript event handling.
- Coordinated 8 stakeholder review cycles that increased on-time delivery by 10% by iterating in an Agile workflow and incorporating feedback into releases.

Certifications

Front-End Development Libraries - React, Redux, Bootstrap, jQuery, and JavaScript libraries

[Machine Learning & Data Science](#) - data analysis, machine learning algorithms, predictive modeling, statistical analysis, and data-driven decision-making techniques

[Introduction to AI](#) - artificial intelligence concepts, machine learning fundamentals, neural networks, and practical AI applications in business and technology

Leadership & Projects

Microsoft - [Student Ambassador](#)

- Engaged in 150 global tech events and delivered 45 technical sessions by collaborating with international developer communities.

Google Developer Student Club - [Technical Lead](#)

- Mentored 300 students through 20 workshops by teaching HTML, CSS, JavaScript, and core computer science concepts.

YouTube — Coding with Ree - [Content Creator](#)

- Published 12 coding videos that increased subscriber engagement by 20% by teaching practical development workflows and problem-solving.

Education

Sault College, Brampton, Ontario, Canada

2024 – 2025

Post Graduate Diploma in Cybersecurity (Co-op)

Guru Nanak Dev University, Punjab, India

2020 – 2023

Bachelor of Science in Computer Science

Courses: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Web Technologies, Secure Software Development, Cloud Security, Linux Systems Administration, Cryptography
